WORK EXPERIENCE

Parrish Design **Sep. 2022 – Present**

Founder & Full-Stack Web Developer *Remote*

- Design, develop, and deploy production websites and full-stack SaaS applications, owning projects from architecture and implementation through testing, deployment, and ongoing maintenance.
- Build applications using **TypeScript, JavaScript, React, Next.js, PostgreSQL, Supabase, Cloudflare, and Cloudflare Workers,** integrating authentication, databases, APIs, payment processing, and CMS platforms.
- Develop production functionality integrating **Stripe, PayPal, Payload CMS, Sanity CMS,** and third-party APIs across e-commerce, SaaS, and business applications
- Implement application validation, automated testing, monitoring, and CI/CD workflows using **Zod, Vitest, Sentry, GitHub Actions, and Cloudflare Turnstile.**
- Use AI-assisted development workflows to accelerate implementation and problem resolution while independently reviewing, testing, and validating production functionality.

KnowBe4 **Jul. 2024 – Apr. 2026**

Core Support Technician *Clearwater, FL*

- Diagnosed and resolved enterprise integration issues across Microsoft Entra ID, Active Directory, Google Workspace, LDAP/LDAPS, and mail environments, including configuration, connectivity, authentication, permissions, SSL/TLS, and synchronization issues.
- Investigated on-premises Active Directory integration failures involving LDAP connectivity, network ports, SSL configuration, directory permissions, and authentication-related issues.
- Diagnosed email delivery and mail-server configuration issues involving allowlisting, filtering, and delivery across enterprise environments.
- Analyzed system configurations, reproduced technical issues, isolated root causes, and documented resolutions for complex integration problems.
- Achieved #1 in ticket resolutions company-wide for two consecutive months and received 200+ positive customer satisfaction reviews with a 100% positive rating throughout 2025 and 2026 up to departure.

FEATURED PROJECT

PermitFalcon *Next.js, TypeScript, PostgreSQL, Supabase, Cloudflare Workers*

- Contracted to build a B2B SaaS platform that scrapes public county building permit records into a database which is presented as a streamlined, filterable list for contractors and building suppliers on the front-end.
- Built scheduled ingestion on Cloudflare Workers that pulls data from county portals and GIS feeds in different formats, skips unchanged files, and sends alerts when a source changes.

EDUCATION

St. Petersburg College **Dec. 2025**

Bachelor's Degree, Cybersecurity *St. Petersburg, FL*

- Member, TitanSec Cybersecurity Club
- Coursework included cybersecurity fundamentals, networking, security assessments, and auditing.

SKILLS & INTERESTS

- **Technologies:** TypeScript, JavaScript, React, Next.js, PostgreSQL, Supabase, Cloudflare, Jira, Google Cloud, Google Workspace, Microsoft Entra ID, Active Directory, OAuth 2.0, Git, GitHub Actions
- **Skills:** Full-Stack Development, REST APIs, Authentication & Authorization, Identity & Access Management (IAM), CI/CD, Automated Testing, API Integration, Root Cause Analysis
- **Interests:** Rock Climbing, Fishing, Hiking, Camping, Gaming, Music Production, Photography
